1

Case 1 : 56-year-old woman, childminder

January 2016: Pain and functional impairment of the right shoulder following trauma in November 2015.

The medical history is a work accident on November 25, 2015, with application for and recognition of disability benefits.

The MRI of January 5, 2016, shows degenerative omo-humeral lesion with an intra-articular loose body and reactive joint effusion.

Significant tendinosis of the long head of the biceps. Insertion tendinosis of the supraspinatus.

2

Sick leave due to a work accident (November 2015) until permanent sick leave following disability recognition on January 2017 due to inability to lift children.

Cause of sick leave or accident: the right arm and right shoulder were injured following a violent blow received while changing a 4-year-old child.

It was a sudden pain that still persists at the time of consultation.

3

Date	Right ear treatment	Left ear treatment	Affected area	Patient's experiences	Practionner's observations
13/01/16		Shoulder area : 53/58/25/16/47/80B	Right shoulder and biceps : 53/58/25/16/47/44/80B	Increased pain for 3 days, return of shoulder mobility	
22/06/16		Shoulder area : 53/58/25/21/49	Right shoulder and biceps : 53/58/25/21/49/80B	Marked decrease in pain for 4 days.	Unable to drive
29/06/16		Shoulder area : 53/58/25/21/49/47	Right shoulder and biceps : 53/58/25/21/49/80B	Sharp tingling in the ear during the projections of 21/49	More prolonged decrease in pain and reduced immobility
06/07/16		Shoulder area : 53/58/25/21/49/47	Right shoulder and biceps : 53/58/25/21/49/80B	Marked improvement in pain and mobility	Improvement lasts for more than a month.
04/11/16		Shoulder area : 53/58/25/44/16	Right shoulder and biceps : 53/58/25/44/16	Mobility restored, very little residual pain.

4

Study results, in march 2018: progressive improvement leading to near-total disappearance of pain and functional impairment after 4 sessions.
A follow-up session was held 4 months later:

Experience after Photonic Medicine treatment:	Currently:
After the first session: very sharp pain for 3 or 4 days, then the pain decreases and disappears completely after 3 or 4 sessions.	Mobility restored at 80%
Complete recovery of the right forearm after the first session.	Almost no pain except during changes in weather or sudden, accidental movements
The improvement lasts up to now	No pain killer nor anti inflammatory treatment has been taken.

5

Case 2: a case of chronic sinusitis

Seen first in November 2016: Chronic Sinusitis, in a 70 years old woman

Sinusitis began upon returning to her living place: Pas-de-Calais (pollution/climate?).

CT Scan revealed an intra-sinus exostosis of the right maxilla.

6

Date	Right ear treatment	Left ear treatment	Affected area	Patient's feelings	Observations
30/11/2016	Sinus area: 53/58/25/21/44		Frontal and maxillary sinuses : 53/58/25/21/44	Strong sensation of electric current when passing 58 over the ear Immediate	- improvement of about one week complaints of tracheo bronchial hypersecretion
17/01/2017	Sinus area: 53/58/25/21/44 Tracheal and lung area :53/58/21		Frontal and maxillary sinuses : 53/58/25/21/44		Clear and lasting improvement after a few days

7

Results:

No relapse as of November 2017, 10 months after the last treatment, either sinus or tracheobronchial.

Comments: Temporary improvement after one session.

The effect was significantly increased and stabilized after a second session on a chronic condition.

8

Case 3: Acute, severe cystitis

A 51 years old woman, engineer.

For approximately 10 years: 3 acute cystitis per year, one of which developed into pneumonia. Since then, every cystitis was treated by systematic antibiotic treatment.

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

9

Following a request for a prescription for antibiotics and analgesics (crying due to the pain), a treatment with photonic medicine was proposed

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

10

Date	Right ear treatment	Left ear treatment	Affected area	Patient's feelings	Observations
01/08/2017	None	None	Bladder area: 53/25/54/58/80	Immediate sensation of localized heat	Strong VAS reaction

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

11

Immediate improvement in pain and urinary frequency without medication.

Follow-up after 7 months: no relapse.

This suggests a direct local action of photons.

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

12

Case 4: Insomnia and asthenia in a man of 60 years old

Sleep disturbances dating back to 2012, the year of separation from his partner.

For several years, numerous nighttime sleep interruptions with daytime asthenia.

First consultation end of september 2017

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

13

Date	Right ear treatment	Left ear treatment	Affected area	Patient's feelings	Observations
28/09/2017	Hypothalamus area: 53/49/ Entorhinal zone :9		Entire skull: 53 Fontanelle:49 The entire spinal chord:24	Immediate improvement in sleep for 15 days, then waking only once or twice a night	
08/12/2017	Hypothalamus area: 53/49/ Entorhinal zone :9		Entire skull: 53 Fontanelle:49 The entire spinal chord:24	Undoubtedly a very clear improvement in sleep immediately after this consultation	

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

14

Insomnia resolved after the second consultation

Seen again in February 2018, the patient reports that after 5 years of poor sleep, an immediate and cumulative improvement occurred after 2 consultations, accompanied by a feeling of calm.

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

15

CASE 5: 70 years old women, retired civil servant

Seen mid November 2017 for a pain on the top of the right foot for approximately one year, exacerbated in the last month

An avid hiker and gardener, the pain, which developed gradually, has become debilitating.

MRI is scheduled for a near future

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

16

Date	Right ear treatment	Left ear treatment	Affected area	Patient's feelings
10/11/17		Foot area:53/44/25/47/21/58/80B	Upper Side of Right Foot : 53/44/25/47/21/58/80B	Immediate Cessation of Pain

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

17

Notified by SMS ten days later:

“The pain has completely disappeared.
Has already been able to do two hikes.
MRI cancelled. »

18

Case 6 : man, retired nurse 71 years old

Fall on coccyx approximately 2 years ago.

Since then, lower back pain, especially in the left paravertebral region.

Having no treatment.

Seen first mid january 2018.

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

19

Date	Right ear treatment	Left ear treatment	Affected area	Patient's feelings	Observations
18/01/2018	Lumbar area: 53/44/25/58/35/80 Paravertebral muscle area :53/47/16		Lumbar area: 53/44/25/58/35/80	Strong sensation of fluid upon local application of : 25/58/35/80	Partial cessation of pain 3 days after this consultation
08/02/2018	Lumbar area: 53/44/25/58/35/80 Paravertebral muscle area :53/47/16		Lumbar area: 53/44/25/58/35/80	Sensation of electricity when passing from 16 to paravertebral	Pain greatly reduced after the 1st consultation, disappears after the 2nd consultation
08/03/2018	Lumbar area: 53/47/44/21		Lumbar area:53/47/44/21	None	Very little information from the pulse assessment

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

20

Disappearance of chronic pain; only a sensation of slight tension remains in certain positions

Comments:

As the result was stable for another 3 weeks after the 2nd session, the 3rd session initially intended wasn't justified, and was cancelled.

21

Case number 7

Women born in 1932

Worked in fashion. Married, 2 children

Her medical case history reveals:

- Lumbar disc hernia with surgery in 1964
- A road accident with fracture of both perones and tibias
- A left knee replacement followed by a Sudeck's syndrome in 2010
- In 2011: a replacement of right hip following a femur fracture
- Right knee replacement in 2016

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

22

First consultation

She hardly walks with intense back pain in whole spine with a V.A.S à 6-7 and left cruralgia following a period she had a left L5-S1 sciatic pain. She complains not being able to do anything due to the pain nothing can stop.

Due to lack of time I treated only in the ears the spine with 53/25/44/80/12/47/21/98 as on the homonculus, and put 2 ASP needles to relieve pain (hypothalamus and reticular formation).

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

23

15 days later....

She had no pain at all during the following day, but came back on the left side at level of 4 on V.A.S, and at 7 at level of the thoraccs spine and ribs.

I worked with photonics mainly on her spine with 53/24/25/44/80/58/12/47/38/21/98 , and then on the homoculus with 53/short 24/ 44/80/98/38, and then lying down on her spine with 3/24/25/44/80/58/12/47/38/21/9

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

24

One week later...

After last session she was fully relieved for 5 days, and walks much better, and pain intensity in thoracic spine is at 2-3 on V.A.S, and she is no more suffering from her sciatic pain

The same treatment on ears and homoculus was applied.

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

25

One week later

Pain goes on decreasing and suspecting arthrosis on her spine, I modified the ear and local spine sequence, mantaining the homonculus ttrratment as before.

The new ear and local spine sequence was :
53/25/44/80/5812/35/44/80/47/58/21/98

Copyright Dr Pascal Vidal. This document is the property of the Institute of Photonomedicine and may not be reproduced or circulated without permission.

26

One week later

She felt like floating while getting out last session. She felt much better and began gardening again (she could not do gardening for the last six months), and got body aches on her lower back, at the level of 3 in the V.A.S.

But she was so happy gardening again...

I practised the same treatment as before, insisting on her sholder and on

27

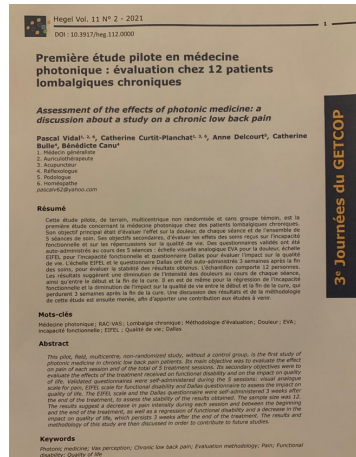

One month after she was gardening more than before, having no pain in the spine, but only back aches when she was doing too much, and it looked like she regained fluidity in her movements and walking attitude.

I saw her once a month for a while and the improvement lasted.
