

## About CCA

CCA was founded in 2003 by Matt and Susan Brennan who had recently received a diagnosis of autism spectrum disorder (ASD) for their youngest son. When seeking the recommended services for their son, they quickly learned that there were very few programs offering effective, early, and intensive treatment for children with autism in the Cincinnati area and those that did, had long waiting lists. Out of dedication to their son and the greater community, they started the Cincinnati Center for Autism (CCA) as a small outpatient program providing Applied Behavior Analysis (ABA) and Speech and Language Pathology (SLP) services. From those roots, CCA has grown into a fully functioning multidisciplinary center, providing a broad range of services for a growing number of children with ASD and their families in the region.

Full-Day: 9:00 am to 3:00 pm  
AM Session: 8:30 am to 11:30 am  
PM Session: 12:00 pm to 3:00 pm

# SUMMER SERVICES

## CAMP ABILITY

Camp Ability, a center-based summer camp experience, is dedicated to providing fun, friendship and lasting memories. This half or full-day camp is offered to individuals who are looking for a structured and creative summer experience. All activities are designed specifically to address growth in communication, socialization, play/ leisure, daily living skills, and positive behaviors. This program is led by CCA's experienced staff at ratios that are appropriate for the individualized needs of campers, either 1:1 or 1:3 (1 staff : 3 campers). Activities may include cooking, yoga, crafts, water play, science experiments and dancing. Students enrolled in ESY may participate in this program.

## OCCUPATION EXPLORATION

The Occupation Exploration Program (OEP) is a six-week vocational and social skills program. This program teaches individuals how to find a job, build a resume, prepare for an interview, exhibit expected workplace behavior, and manage workplace stress and budgeting. Each week campers cover a different topic with four lessons related to various aspects of having a job. The OEP provides individuals the unique opportunity to explore and shadow a range of different job locations. Through the OEP, individuals' knowledge, skills, and interests will be cultivated, which can increase their employment qualification and opportunities, independent living skills, and quality of life. Students enrolled in ESY may participate in this program. Contact us to determine if your student qualifies for the Occupation Exploration Program.

## EXTENDED SCHOOL YEAR (ESY)

Extended School Year (ESY) services are designed to maintain the academic, social, behavioral, communication, and other skills included on a student's Individualized Education Plan (IEP). An experienced staff member is dedicated to supporting each student's goals, recording data, and providing a progress report at the conclusion of services. All programming is designed and overseen by an Intervention Specialist. ESY students may also be included in Camp Ability's fun-filled activities or Occupation Exploration activities for a portion of the day, giving them the best of both experiences! Eligibility for this service is determined by the IEP team and a placement is secured through a school district agreement.

## INTENSIVE ABA INTERVENTION

CCA offers center-based and home-based intensive 1:1 ABA services according to your child's needs, funded through private insurance reimbursement. In this program a BCBA will partner with you to develop a meaningful treatment plan, founded in the evidence-based practices of ABA, specifically targeted toward improving social skills, communication, and daily living independence while reducing challenging behavior. This plan will be implemented by a skilled behavior technician with ongoing oversight and training from a BCBA. A vital component of the effectiveness of this intensive intervention period is parent training and participation. This program requires at least a 6-month commitment to assure the time needed to develop a strong team between the child, parent, behavior technician, and BCBA and to bring about socially-significant changes toward the fulfillment of your child's full potential.

# APPOINTMENT BASED

## SERVICES

## INTENSIVE FEEDING PROGRAM

Intervention provided to children with oral motor, sensory and/or behavioral needs related to feeding. The intervention will target developing appropriate mealtime routines, decreasing anxiety related to trying new foods, and increasing oral consumption of a variety of foods. Intervention will be provided by a Speech-Language Pathologist, and/or Occupational Therapist, in collaboration with a Board Certified Behavior Analyst.

## SPEECH LANGUAGE THERAPY

Speech therapy services at CCA address the following in small groups or individual sessions: speech, language, social skills, and use of augmentative/alternative communication (AAC) systems. The speech language pathologist (SLP) will work with the family and/or school district to create a program that is functional and tailored to address each student's needs. Sessions are appointment-based and can be arranged through school district contract or by an individual family.

## OCCUPATIONAL THERAPY

Occupational Therapy services at CCA are able to address the following: fine motor development, sensory integration, adapting the environment to support educational and medical objectives and educating the client/family to increase participation in activities of daily living skills including dressing, hygiene and feeding. Sessions are appointment based and can be arranged through school district contract or by an individual family.

## CCA FIT

CCA Fit promotes fitness for children and young adults with autism, providing physical foundation for strength, stability, and motor planning in a way conducive to the athlete. Combining a Best Practices approach from the fields of exercise science and ABA, the program considers each athlete from 3 areas of functional ability: Physical, Adaptive, and Cognitive. The certified autism fitness instructor (CAFP) will train the student athlete 1:1 creating a fitness intervention tailored to each individual.
