

Reading Success in Action

Lesson Sequence Decoding 2

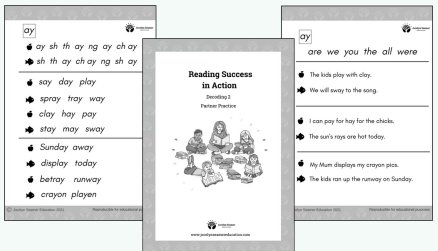

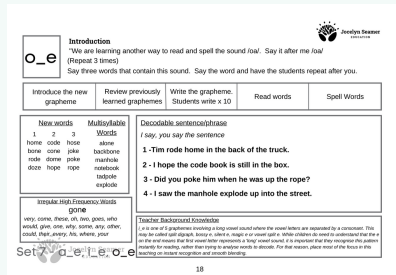

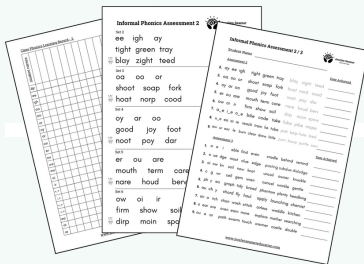

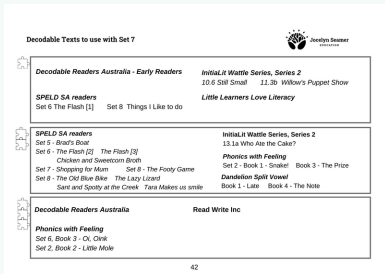

School Order Form

This simple sequence of lessons will lighten your teachers' cognitive load and help to create consistency between your classes as you develop students' phonics and decoding skill. This resource contains:

- Videos accessed via QR codes showing how to teach each component of the lesson
- A 'lesson plan on a page' for each grapheme that contains word lists, decodable sentences, irregular high frequency words and teacher background knowledge.
- A page of suggested decodable texts (including free resources) aligned with each 'set' of graphemes. These titles are then divided by level of complexity to support your differentiation decisions.
- Downloadable, reproducible partner practice booklet
- Informal phonics assessment and class tracking sheet

What's Included

Lesson Sequence Book – \$88 per book (including GST and postage within Australia)

Please note: the lesson sequence is not a reproducible resource
