Formula for Fee Including Consultations

X= Your session fee

Y= Average number of hours in collaboration over course of work together

Z= Average number of sessions

(It's been a while since I took Algebra. The math is right, but the letters are weird.)

X x Z= A

X x Y= B

A + B= C

C/Z= $ per session

Example:

X= $100/session

Y= 4 hours

Z= 20 sessions

A= $2000

B= $400

C= $2400

X x Z= $2000

X x Y= $400

$2000 + $400 = $2400

$2400/20= $120/session
