

HOMEWORK Part I:

- Spend some time with your own horses and herds this week, just observing.
- Are they working on each other?
- What areas are they focusing on?
 - Knowing what you do about chakras and meridians why do you think they are focusing on these particular areas?
 - Does this add up with any issues you've been seeing in your horses, clients, or yourself?
 - How did you feel as you observed?
- Are specific horses working on other horses more than others?
- Are specific horses receiving balancing more than others?
