The screenshot shows the 'My Profile' page for James Neale. The user is registered on 12th January 2021 in Nickolas Stewart's circle. 32. Scroll down to update your profile – upload a profile picture, update referral code (Note- you can only do this ONCE, so make it good), insert any other details you want.

The screenshot shows the 'Update Profile' page. It includes several sections for updating user information:

- Update Profile Photo:** A section with a placeholder for a profile picture and an 'Update' button.
- Update Referral Code:** A section with a text input field containing 'digitalnomad', a 'Current Referral URL' field with the value 'https://www.clearunited.com/pages/digitalnomad', and an 'Update' button. A warning message states: 'Warning: This can only be updated one time!'.

33. After updating your Referral code please go to Dashboard and do 2x things –

- b. Select a score of 10 on the Net Promotor Score at the top of the Dashboard and hit submit – we do this because it helps everyone in DBM earn more Rewards from the Global Pool Bonus.

Phone Set-Up Instructions

Simple and straight forward

Charge the phone first to 100%. Ensure you have a strong WiFi connection.

Next thing to do is follow the set-up video and transfer over to ClearPHONE by going to the website – www.clear.support

Please choose EITHER With OR Without Google as per your new device and follow the set-up video exactly – Top Tip: Watching on a laptop and stopping it every 15-30 seconds and copying the instructions works best!

There are also set-up calls that can be attended but they're not usually necessary these days with the easy to follow step-by-step phone set up process – but if you want to, there are details on www.clear.support to book in a support session or join a group call.

Transferring Your Data

eg. Contacts, Photos/Videos, Calendar etc

For simple transfer of data the App called X Transfer is good. Download onto both devices, scan the QR code to link them and follow instructions.

For those who want to download/Backup their iCloud / iPhone Notes to a PC, This app works well

<https://www.imboie.com/anytrans/>

What some people use to transfer contacts and other operations

<https://mobiletrans.wondershare.com/>

<https://apkpure.com/mobiletrans-transfer-data-to-new-phone/com.wondershare.mobiletrans>

You can also use a USB C thumb drive like this with your phone & computer. Put all you photos into named folders so the phone recognises them as albums.

<https://www.amazon.com/RAOYI-Smartphones-MacBook-Tablets-Samsung/dp/B07FFTHGS1>

So many options to work with – the choice is yours.

Downloading Your Apps

Clear App Store & Other Anonymous App Store Options

On a de-Google'd ClearPHONE people wonder how to download apps.

Clear Apps works well for downloading many apps and is your first port of call for downloading all Apps because it is the most secure, cleanest version of those apps you will find.

Other alternative App stores that we recommend are ones such as Aurora Play Store and APK Pure. On these App stores you can bypass Google. Simply open your Clear Web Browser and internet search for them or click the following links:

<https://aurora-store.en.uptodown.com/android>

<https://m.apkpure.com/apkpure/com.apkpure.aegon>

Download and install latest versions. Allow Permissions.

Check this out for other alternative App Stores in addition to the above

<https://www.makeuseof.com/tag/safe-android-apk-downloads/>

Clear Apps

Making submissions

You can also make submissions for any 3rd party app or features you would like to see in the ClearOS marketplace here:

<https://www.clearos.app/apps/request>

You have options, ClearAPPS or ClearMarketplace is your first option always.

They have full confidence in their Apps but they need time to test and ensure they are all cleaned of Ads and Trackers etc before placing on the ClearMarketplace – this takes time and Clear are building the library as fast as they can.
