

Working in a Group Practice vs Going Out on Your Own

If someone shows you how, do you want to be responsible for your own income? (**the most important question**)

Are you willing to invest time &/or money into doing it effectively?

Do you have a few hours a week (2-5) to devote to building your practice for the next few months?

Do you have savings? (Most people need a few months of living expenses saved to feel safe.)

Have you done the math comparing your overhead as a private practice owner vs what you're getting paid?
