

## Favorite Financial Resources for Therapists

I love Tiffany McLain's [Fun with Fees Calculator](#). It helps you do the math to determine your fee.

Linzy Bonham at [Money Nuts & Bolts](#) teaches money skills for therapists that work for your practice & your life.

You need an accountant & a bookkeeper. Trust me on this. I like [Heard](#) because they're less expensive than what I paid my accountant when I was solely in private practice and they specialize in therapists in private practice.

[Profit First for Therapists: A Simple Framework for Financial Freedom](#) by Julie Herres is a great book that helps you figure out how to allocate money within your business. It adapts the Profit First model, which is extremely popular in the business world.
