ACTIVATING COMMUNITY TRANSFORMATION
CENTRES & BIOREGIONAL NETWORKS FOR RESILIENCE AND REGENERATION

Co-funded by the
Erasmus+ Programme
of the European Union

The Activating Community Transformation project is an EU-funded Erasmus+ collaborative partnership project running from 2020-2023. Its aims are:

1. To help grow **an international network** of learning and demonstration centres
2. To share **good practices** in the fields of **sustainability, regeneration and resilience** between those centres
3. To help those centres to **activate community transformation** by offering a range of related demonstration and learning programmes and resources that help spread that good practice.

This has been done by gathering, analysing and collating good practices, defining a competence framework for those involved in managing such centres, providing inspiring case studies of successful projects, and collating a set of valuable tools online.
